- Architecturally/aesthetically Good & Appreciated by many
- Self-running, no operational and maintenance cost.

DAYLIGHT-Transparent Dome has various advantages

DAY LIGHT-Transparent Domes designed to maintain comfortable living conditions by extracting stale, hot and humid air and maintaining a constant flow of fresh air. The translucent dome also delivers a soft glowing light, saving energy and keeping the environment inside healthy as light drives away pests. Be it summer or winter the conditions are "just right." This improves health, results in a better life style and a tremendous increase in concentration and efficiency since a relaxed and comfortable state of being is an aid to better mental and physical performance.
